Good afternoon, teachers , everybody.

I'm David in Class 3,Grade 3, I'm very happy today because I can give speech here and let me have the chance to show all of you my capacity and charm.

I'm an outgoing and kind-hearted boy, love of learning, positive with broad interests and like to help others. I have been the monitor of class since the first grade. I'm a good helper of the teacher, and a good partner of the students.

I love reading, I have been listed in one of the top students in my show and grade. Under the guidance of the teachers, I actively help students in need of help in the study, do homework with them together, and take initiative to solve problems they encounter in learning, and teach them what they won't do.

I can actively take part in in-class and outside-class activities, to exercise and enrich myself in these activities, to make me stronger and more confident in order to make the most of my potentials.

I have a thankful heart, it is from the teachers and my parents for their education and care to me. So I'm very much concerned about the students of my age from poor families in society.

In the spring of 2012, I had launched a proposal to all the students in school to give their piece of love to help the students from poor families. I took the lead to donate some school supplies . Under the school's care and organization, all students in school actively participate and give their beloved school supplies. Through this activities, students realized that we also have a thankful heart, a heart to help others although we are elementary students .

In addition to study cultural knowledge, I also have a wide range of hobbies, such as wang, piano, percussion, handwriting, ping pong , tennis and so on, at present, I have passed , some examinations and won some prizes as followings:

Certificate grade 8 for music examination in Shanghai
Certificate level 3 for wang test in Shanghai
Certificate level 5 for art test of China Arts Institute
English final second prize for Shanghai supper five-star English test
Kaiping cup final of Shanghai third prize
Popular science English for pupils of Xujahui district third prize
Best model award in Xujahui district
"Lin Sanyu' scholarship for outstanding students in school
School "Two good juveniles" the glorious title
Nearly 50 school awards in science, arts and kinds of activities

In the future, with the help of the teachers in education, we should study hard, carefully complete everything, lead the progress of the class, become good students in all-round development of morality, intelligence, physique. I sincerely hope your support and give your precious vote to me. I certainly won't let you down. I will use my actions to prove my ability. You and I together, for the sake of our own future and of creating a better tomorrow for school. Thank you everybody, thank you!
